(54) Title: **ROUTE OBJECTS IN TELECOMMUNICATIONS NETWORKS**

(57) Abstract: The invention provides, in a telecommunications network, a route object (RO) computer program product, comprising means for creating a RO which presents a user with editable fields relating to more than one type of RO, and allows the user to specify the contents of one or more of the fields to create any one of the types of RO. The editable fields may relate to a protocol used by the RO, or a type of route defined by a RO, or at least one network element (NE) of a route defined by the RO, or at least one hop of the RO. The RO computer program product may comprise means for interfacing with the user, for example a GUI which presents one or more windows to the user to allow the user to create a RO. For example, a NE listing window may be presented to the user, which comprises a NE context menu having a create RO menu item which brings up a window comprising a RO creation dialog box, which comprises one or more editable fields relating to more than one type of RO and the user specifies the contents of one or more of the fields to create any one of the types of RO.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 H04L12/24

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H04L H04Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ, WPI Data

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	EP 0 614 151 A (IBM) 7 September 1994 (1994-09-07) abstract columns 3-19 -----	1-21

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
